Tachus 10 Electronic Target System

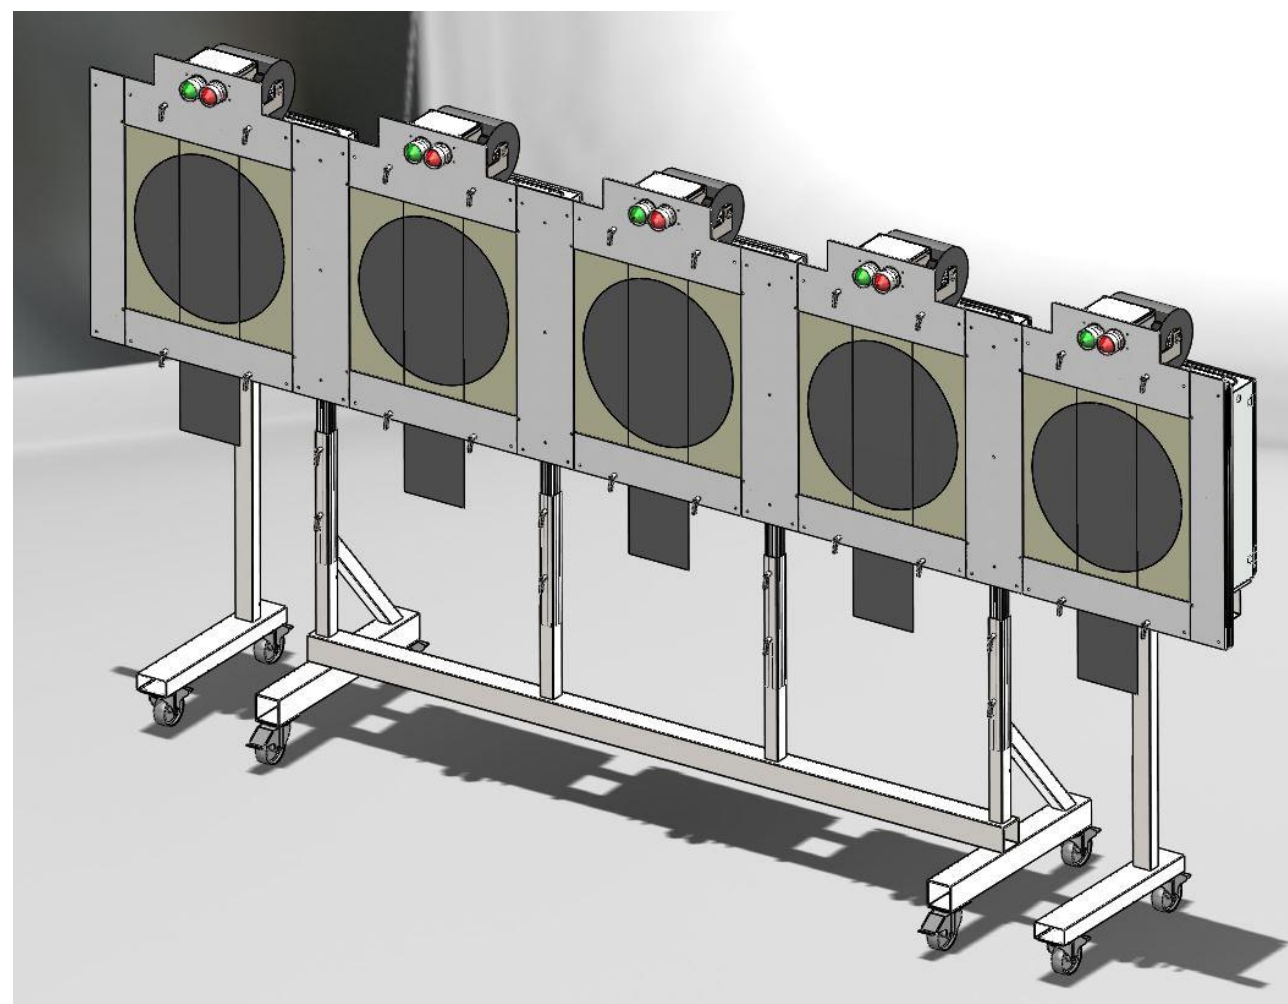

Tachus 10 Electronic Target System is the first ultrasonic based 'Made in India' Electronic Target System for 10 Meter Air Rifle and Pistol ISSF Shooting Events (4.5 mm, 0.177 Calibre). System works on robust ultrasonic measurement technology and uses paper roll as a medium for score detection. Paper roll moves down after every shot for a fixed duration automatically. Duration of paper movement time can be set up by the user. It includes our proprietary Tachus 10 Scoring Software, which has like display of decimal score with direction, series total, match total, 4X Zoom, PDF reports and hardware health measurement. Software can be installed in a Windows OS based laptop/PC (Windows 7/8/10 OS). Target and laptop/PC are connected via cable. Shots are displayed within fraction of second after fire. System has adjustable internal LED illumination for the target face. It also comes with removable pellet-trap for easy maintenance.

KeyFeatures:

- Suitable for 10 Meter Air Rifle and Air Pistol Shooting Events (0.177 Calibre)
- Accuracy is in line with ISSF Standards
- Instant Display of Scores
- Inbuilt Led illumination and Pellet trap
- Tachus 10 Scoring Software (Windows OS Based)
- Two years onsite warranty

Tachus 25 Electronic Target System

Tachus 25 Electronic Target System is the first ultrasonic based 'Made in India' Electronic Target System for 25 Meter Rapid Fire and Precision Shooting (5.6 mm, 0.22 Calibre). System works on robust ultrasonic measurement technology and uses a rubber band as medium for score detection. System comes with a display monitor and pre-installed Tachus 25 Scoring Software. Target and display monitor are connected via cable. Tachus 25 Scoring Software has features like display of decimal score with direction, series total, match total, 4X Zoom, PDF reports and hardware health measurement. System also comes with traffic light control (green and red lights) and inbuilt bullet trap. Bullet trap is filled with granules so there is no lead dust. The bullets are removed from the resealing gel plate braked and caught in the granules. It took 3+ years of research and development time for us to build the Tachus 25 Electronic Target System. System is built with the help and support of many top national and International shooters.

Key Features:

- Suitable for 25 Meter Rapid Fire and Precision Shooting (5.6 mm, 0.22 Calibre)
- Accuracy is in line with ISSF Standards
- Instant Display of Scores
- Inbuilt Bullet trap and traffic lights
- Display Monitor with Pre-Installed Tachus 25 Scoring Software
- Two years onsite warranty

Tachus 50 Electronic Target System

Tachus 50 Electronic Target System is the first ultrasonic based 'Made in India' Electronic Target System for 50 Meter Rifle and Pistol ISSF Shooting Events (4.5 mm, 0.177 Calibre). System is built on robust ultrasonic measurement technology and uses a rubber band as medium for score detection. System comes with a display monitor and pre-installed Tachus 50 Scoring Software. Target and display monitor are connected via cable. Tachus 50 Scoring Software has features like display of decimal score with direction, series total, match total, 4X Zoom, PDF reports and hardware health measurement. System comes with an inbuilt bullet trap. Bullet trap is filled with granules so there is no lead dust. The bullets are removed from the resealing gel plate braked and caught in the granules. It took 3+ years of research and development time for us to build the Tachus 50 Electronic Target System. System is built with the help and support of many top national and International shooters.

Key Features:

- Suitable for 50 Meter Rifle and Pistol Shooting (5.6 mm, 0.22 Calibre)
- Accuracy is in line with ISSF Standards
- Instant Display of Scores
- Display Monitor with Pre-Installed Tachus 50 Scoring Software
- Inbuilt Bullet trap with granule
- Two years onsite warranty
