2-Get each detail of your match!
Tachus 10 Electronic target system helps you with every small detail of your training. Our Match Report not only provides you summary of your match but it gives you details of each shot's location, direction, co-ordinates, distance from centre and time taken for each shot etc. You can download match report, save, share or print it.

3-Resume Previous Match!
What if you could not complete your old match due to some reason and you want to continue same match! Tachus 10 Electronic Target System gives you the option to reload your previous match and resume it further.

4-Customize Your Experience!
Customize Your Experience! Tachus 10 Software allows you to customize your practice. You have options to customize paper feed timer and match timer. You can also change pellet and target colors.

5-Unparallel Support!
Tachus 10 Software not just records each detail of your shooting but also collects information about performance of target system for our technical team which helps us to monitor target in case of support and service.
